

From Clinic to Living Room; A Smarter Approach to Neurofeedback

- ✓ Remote brain training,
 - ✓ Clinical precision,
 - ✓ Real-time insights,
- All in one mobile EEG platform.

What is BrainGoMo

Braingomo combines a smartphone app and a dashboard to deliver real-time neurofeedback, enabling clinicians to remotely monitor and personalise patient training.

Why Choose BrainGoMo

- Enabling training anytime, anywhere for your patients
- A clean dashboard to supervise and be in touch with your patients
- Compatible with a variety of EEG wearables
- Interactive games & videos for engaging brain training

BrainGoMo

How It Works

1. Install

the app & create your account.

2. Connect

your EEG wearable device.

3. Select

and launch a suitable program.

4. Train

with immersive and gamified feedback.

5. Track

outcomes via clinicians dashboard.

Who We Are

Virgobit is a Münster-based team in Germany specializing in innovative home-based healthcare solutions. We seamlessly integrate wearable devices and smartphones to deliver cutting-edge healthcare services beyond traditional clinical settings.
