BrainGoMo

Smartphone-based Neurofeedback Platform

Spica

Remote Health Data Collection Platform
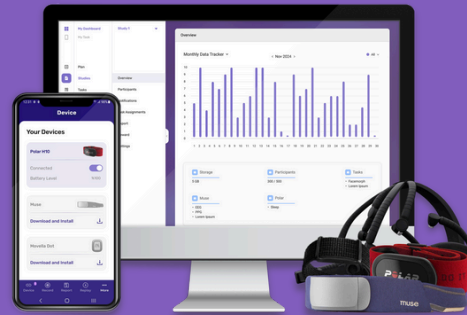

About BrainGoMo

BrainGoMo is a smartphone-based neurofeedback platform designed for both home and clinical use. It offers real-time brain training through interactive games and videos, while clinicians can remotely monitor progress and personalize training using a secure online dashboard.

- App-guided neurofeedback sessions
- Multiple protocols (Focus, Relaxation, Sleep, …)
- Compatible with a variety of EEG wearables
- Interactive games & videos for neurofeedback
- Clinician dashboard for real-time monitoring

About Spica

Spica is a remote patient monitoring and health data collection platform designed for scientists and clinicians to gather health data remotely using wearables and smartphones. Spica enables simultaneous data recording from multiple devices, with secure data storage on a server.

- Seamless Ecological Momentary Assessment
- 24/7 Continuous Remote Health Monitoring
- Broad Compatibility with Wearable Sensors
- Synchronised Multi-Modal Data Collection
- Intuitive Dashboard for Managing Users & Data
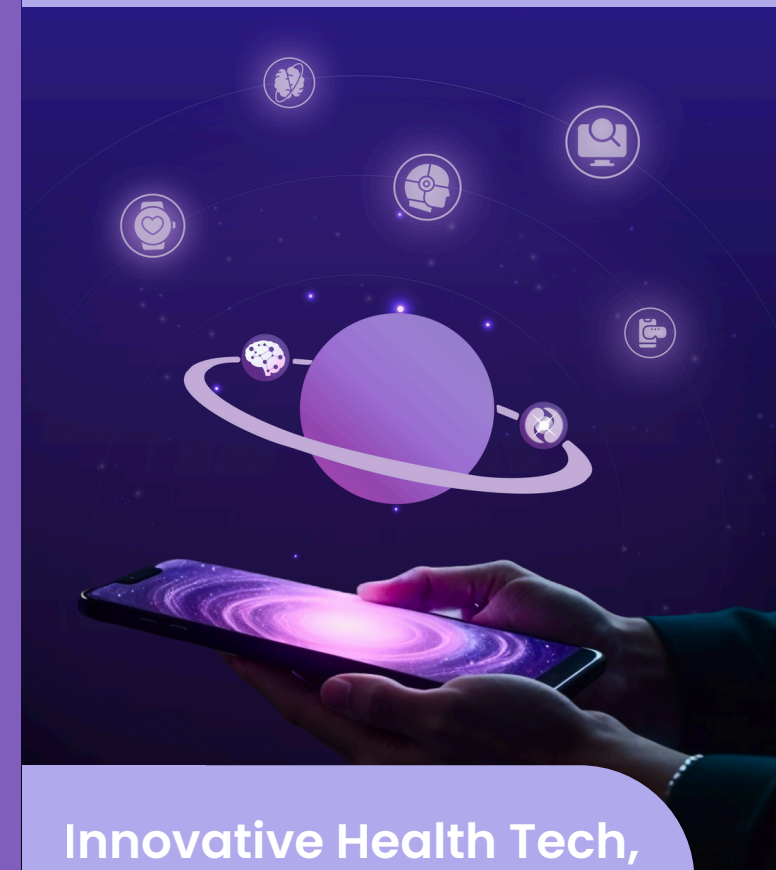

Innovative Health Tech, Designed for Real Life!

- Home-based Healthcare Solutions
- Wearables + Smartphone Integration
- Real-time Solutions Beyond Clinics

CASE STUDIES

KIKAN

Interactive Therapy for Children with Anxiety

In collaboration with:

- WWU MÜNSTER
- UNIVERSITÄT OSNABRÜCK
- HAW HAMBURG

SFB/TRR 393

Trajectories of Affective Disorders

In collaboration with:

- WWU MÜNSTER
- Philipps Universität Marburg
- TECHNISCHE UNIVERSITÄT DRESDEN
- universität bonn
- KIT – Institut für Technologie
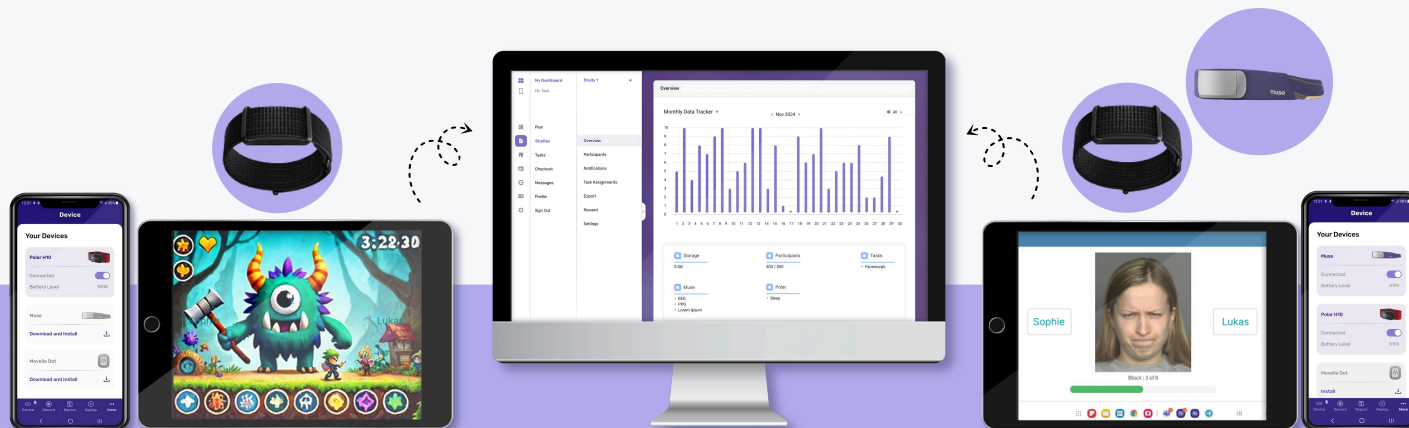

Our Role:

- Remote physiological data collection
- Game integration support
- Data & patient management dashboard
- Large-scale data acquisition

Our Role:

- Smartphone-based data collection
- Wearable sensor integration
- Mobile emotional & cognitive task delivery
- Data & patient management dashboard

ABOUT VIRGOBIT

Virgobit is a Münster-based team in Germany specializing in innovative home-based healthcare solutions. We seamlessly integrate wearable devices and smartphones to deliver cutting-edge healthcare services beyond traditional clinical settings.
